

Gem Cabinets
reflecting your style

Cash and Carry In-Stock Program

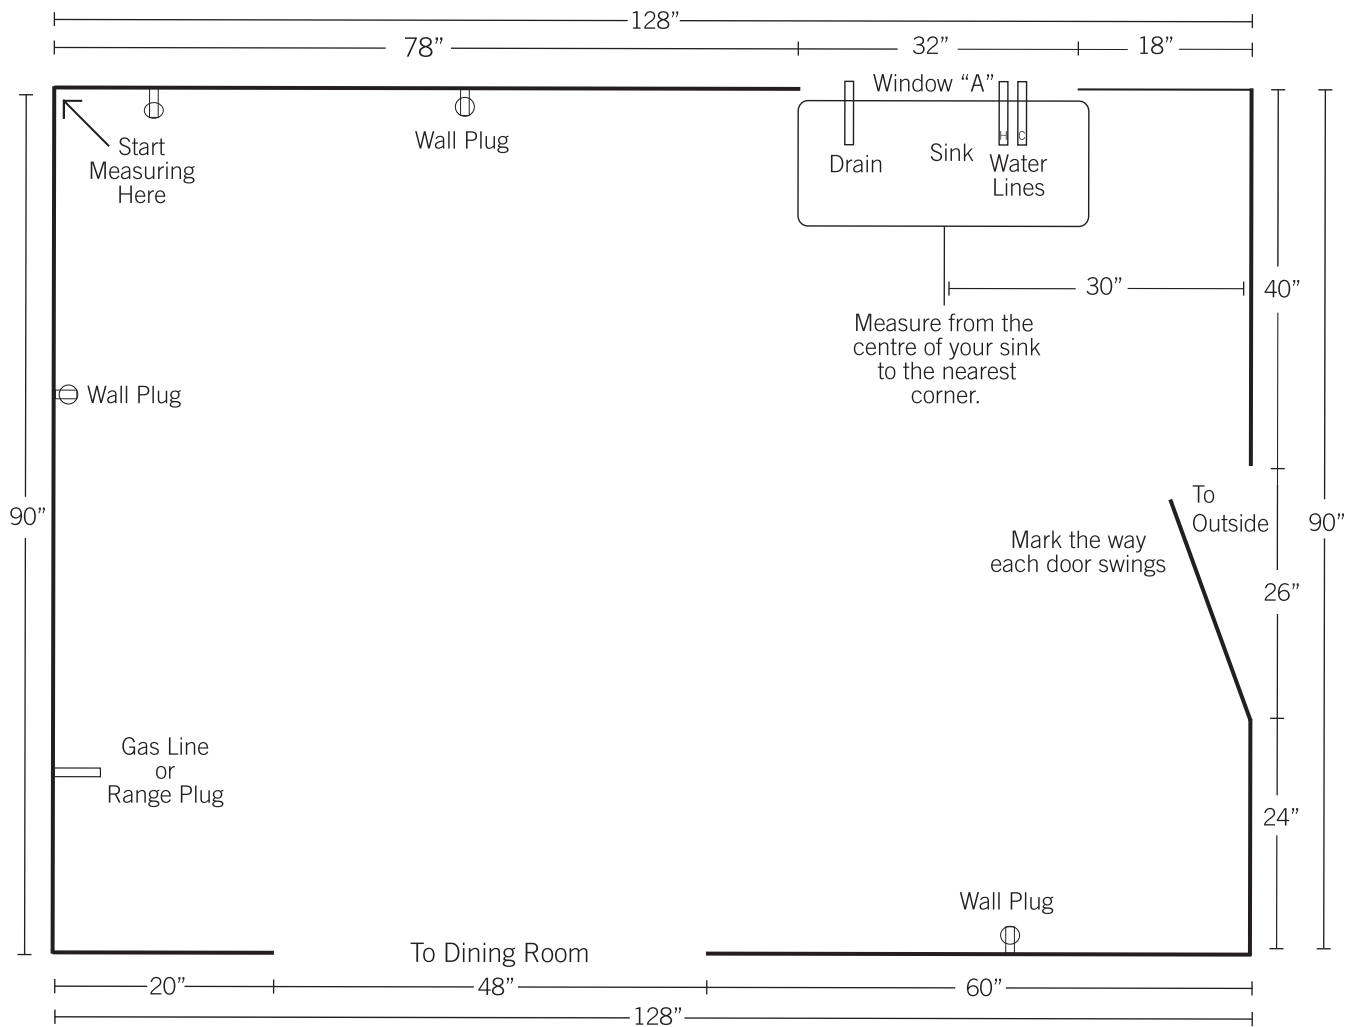

Ideal for do-it-yourself renovators
and contractors

Step by step guide to measuring your kitchen space

Put all the following information on the Grid Sheet on the opposite page using example below:

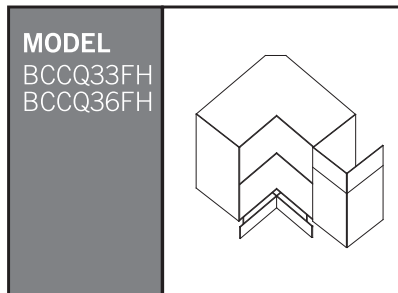

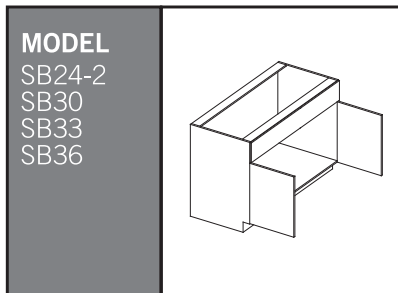

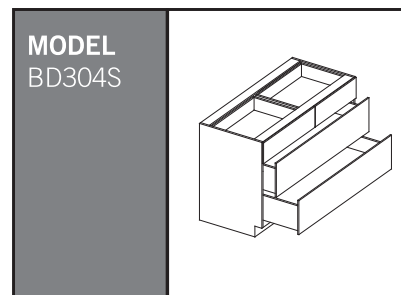

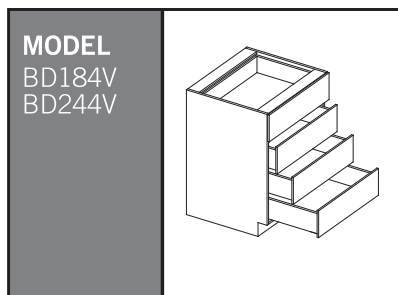

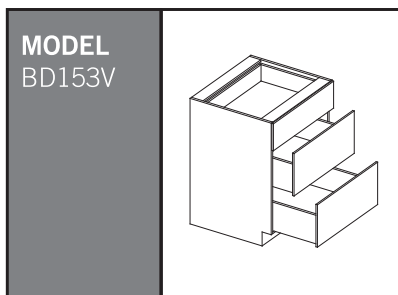

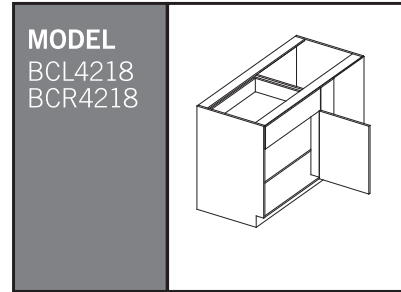

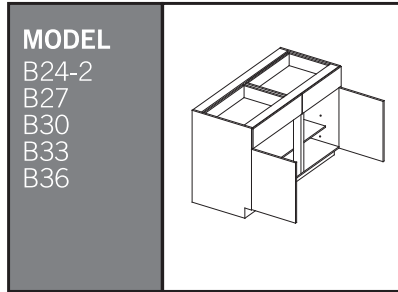

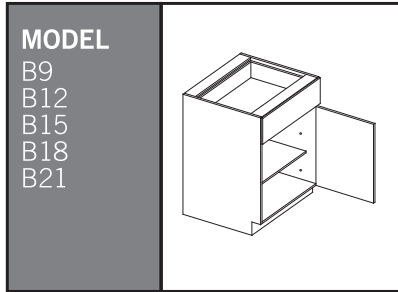

1. Start measuring from the corner shown in the drawing.
2. Measure total length of all walls corner to corner.
3. Indicate the location and sizes of the doors and windows. Include individual corner to window/door sill dimensions.
4. Indicate door swings and location of the electrical plugs and the center line of sink. Include waterline and floor drain locations.
5. Confirm the room height and location of drop ceiling and bulk heads.
6. Indicate appliance locations and sizes on the chart below.
7. Double check all the dimensions - individual and totals.

Product features and benefits - Checklist

Superior and precise specifications provide Gem Cabinets customers with outstanding value.

Cabinets

Cabinets are both dowelled and glued resulting in a solid structure. They retain their rigidity and will not separate at the joints with wear or loading. The boxes are constructed of cabinet grade white melamine and come with standard steel box system.

Interiors

The cured surface is water-resistant and will not lift under normal kitchen conditions. Low-maintenance, easy-to-clean interiors will withstand years of normal wear and tear.

Shelves

The shelves are easily adjusted by removing each shelf and repositioning shelf clips. Cabinet storage space can be altered to suit your changing needs and requirements.
